the struggle to perform well is universal but nowhere is this drive to do better more important than in medicine in his new book atul gawande explores how doctors strive to close the gap between best intentions and best performance in the face of obstacles that sometimes seem insurmountable his vivid stories take us to battlefield surgical tents in iraq to a polio outbreak in india and to malpractice courtrooms around the country he discusses the ethical dilemmas of doctors participation in

lethal injections examines the influence of money on modern medicine and recounts the astoundingly contentious history of hand washing finally he gives a brutally honest insight into life as a practising surgeon unflinching but compassionate gawande s investigation into medical professionals and their progression from good to great provides a detailed blueprint for success that can be used by everyone

water containing significant amounts of inorganic and organic contaminants can have serious environmental consequences and serious health implications when ingested contamination of water health risk assessment and treatment strategies takes an interconnected look at the various pollutants the source of contamination the effects of contamination on aquatic ecosystems and human health and what the potential mitigation strategies are this book is organized into three sections the first section examines the sources of potential contamination this includes considering the current scenario of heavy metal and pesticide contamination in water as well as the regions impacted due to industrialization mining or urbanization the second section goes on to discuss water contamination and health risks caused by toxic elements radiological contaminants microplastics and nanoparticles and pharmaceutical and personal care products this book concludes with a section exploring efficient low cost treatment technologies and remediation strategies that remove toxic pollutants from water contamination of water incorporates both theoretical and practical information that will be useful for researchers professors graduate students and professionals working on water contamination environmental and health impacts and the management and treatment of water resources provides practical case studies of various types and sources of contamination discusses inorganic and organic contaminants and their impact on human health evaluates effective water treatment and remediation technologies to remove toxins from water and minimize risk

refine the art and craft of instructional coaching for more than 25 years jim knight and his team at the instructional coaching group have been studying what excellence in instructional coaching looks and sounds like their findings organized around 7 success factors for instructional coaches and shared via books articles and workshops have helped many instructional coaches around the world to increase teacher effectiveness and improve outcomes for students bringing together for the first time a wealth of resources and practical tools the ic toolkit is designed to guide

instructional coaches either individually or preferably collectively through a 36 week journey of practice reflection and learning for instructional coaches who want to improve and leaders who want to set up meaningful learning experiences the book provides concrete tools including activities checklists case studies and videos that you can use every week additional features include one page descriptions of each success factor a needs assessment to gauge your instructional coaching proficiency in the 7 success factors learning paths to guide your use of the resources and enable meaningful exploration of each success factor end of chapter reflection questions the ic toolkit makes it possible for every instructional coach to become highly proficient in the success factors when instructional coaches become highly proficient in their craft we can see students teachers and systems flourish

preserving the promise improving the culture of biotech investment critically examines why most biotech startups fail as they emerge from universities into an ecosystem that inhibits rather than encourages innovation this valley of death squanders our public investments in medical research and with them the promise of longer and healthier lives the authors explicate the translation gap faced by early stage biotech companies the result of problematic technology transfer and investment practices and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies in preserving the promise dessain and fishman build on their collective experience as company founders healthcare investor fishman and physician scientist dessain the book offers a forward looking critical analysis of conventional wisdom that encumbers commercialization practices it exposes the self defeating habits of drug development in the valley of death that waste money and extinguish innovative technologies through distorted financial incentives explains why translation of biotech discovery into medicine succeeds so infrequently that it s been dubbed the valley of death uncovers specific decision making strategies that more effectively align incentives improving clinical and financial outcomes for investors inventor entrepreneurs and patients examines the critical early stages of commercialization where technology transfer offices and angels act as gatekeepers to development and where tension between short term financial and long term clinical aspirations sinks important technologies deconstructs the forces driving biotech recasts them in a proven conceptual framework and offers practical guidance for making the system better
